EXPERIENCE

Walmart, Rifle — *Cashier, Apparel Sales Associate, Overnight Stocker*

June 2017 - July 2017 | July 2017 - August 2017 | June 2018 - August 2018

Working at Walmart was not my first choice especially as cashier but I grew to have a rhythm. I got good at what I did. When I moved to apparel, I was almost in my zone. Organizing, putting stuff away, making things look nice, beauty being my area of expertise. When I finally turned 18 and got to overnights, I was happy with where I was. Working on my own, getting in the zone of putting things on the shelf. I was good at what I did. I'm a perfectionist, I must make my work perfect. My duties included: handling money, communicating with customers, scanning and bagging items, workstation management, receipt checks, and clothing and makeup presentation and display.

PROJECTS

Small Fan Page — *ICP Fan Page*

For my coding Bootcamp, I was to make a small website dedicated to my favorite band. I can't really pick a favorite so I did the unexpected, I did Insane Clown Posse. Just a small fan page with a picture and a couple links, it was a start.

Word Guess Game — *Serial Killer Themed*

For Bootcamp, I was to make a word guess game using HTML, CSS, and JavaScript. We got to pick our own themes. In continuing with the unexpected, I went with serial killers.

Gem Collector Game — *Math Game*

In this game, made with HTML, CSS, and JavaScript, you have 4 gems that have a value of different numbers. Your objective is to match the randomly generated answer with the values of each gem and not go over the set value.

Trivia Game — *Astronomy Themed*

In this game of trivia you are met with questions about the solar system and the universe. Being an astronomy nerd, I had a lot of fun with this one. Also made with HTML, CSS, and JavaScript.

Giphy Api Website — *Gif Fun*

This website was made using the Giphy API, Bootstrap, and JavaScript. The point was to pull a gif using a keyword in the search box from the website and use that keyword to pull gifs similar to that word and show

SKILLS.

Git, Github, Gitlab.

PowerPoint, Google Docs.

LANGUAGES

HTML, CSS, JavaScript, jQuery.

EDUCATION

Yampah Mountain High School, Glenwood Springs — HS *Diploma*

Graduated one year early, completed a college level writing class, and exceeded volunteer hour requirements.

CMC, Rifle — *Associate of Science*

Jan 2020 - May 2022

I'm only studying for an associate because I want to make sure I'm choosing the right path. Soon I'll go for my bachelors and then my masters.

The University of Denver, Denver — Certificate

Jan 2020 - July 2020

This is a Bootcamp program. I

them to the user. Just a simple little thing.

Train API — *Train Schedule Application*
This project includes Google Firebase and Bootstrap. This website provides up-to-date information about various trains, namely their arrival times and how many minutes remain until they arrive at their station.

Underground Movie Bunker — *Group Project*
This was the first group project of my Bootcamp. A trio of guys and I worked on this project that uses API's, Bootstrap, and JavaScript. You put a movie into the search box then the website pulls reviews, ratings, a poster, and a gif. All on one page.

wanted to take this and get the certificate because I think it was a good choice for my toolbelt. I want to work in cyber-security and my gut told me this was one of the best steps I can take for my future.

Volunteer Activities

Rifle Library

Rifle Sportsman's Club

Community Thrift- Glenwood Springs

Ronald McDonald House- Chicago, IL

Rifle Animal Shelter
